

Object Oriented Technology Online Training Center

Visual Paradigm International is a leading provider of the award-winning Modeling Platform in the world. Tens of thousands of customers, including global corporations, leading financial institutions, and government agencies throughout the world, use Visual Paradigm products to model, build and deploy their enterprise applications. Based on the needs of our customers, the Training Center was setup to serve them for better adoption of our modeling product serious and acquire the up-to-date object oriented technologies faster, better and cheaper!

Maintaining a competitive edge is essential in today's turbulent markets. Our distance learning courses provide the skills and qualifications that can make a difference to your career success, whether you are seeking an entirely new career or boosting your earning potential in your existing career in IT. VP's Object Oriented Online courses allow you to learn at your own pace, to fit around the life you lead.

Our Focus

The Training Center currently provides over 30 online courses in business process modeling, system requirements capturing, system analysis, system architecture and detailed design. Each online course teaches the skills required to use the Unified Modeling Language within one or more stages of a well defined model-driven software development process.

Our Online Courses provide extensive training in the UML v2.2 notation using a pragmatic approach that integrates our modeling tool usages and illustrated with lots examples and case studies.

Alternatively Visual Paradigm can offer tailor-made instructor-led on-site program for you to suite your particular needs. Contact our team for details (sales@visual-paradigm.com)

Unlimited Access, Anytime & Anywhere!

- 24/7 unlimited access for our self paced delivery multimedia learning system anywhere and anytime.
- Hands on learning that encourages you to test what you've learned.
- Step-by-step tool demos and simulations, exercises and practice files ensure that you retain what you study and build confidence in your knowledge.
- Exercises and workshop that show you where you need to focus and revisit.

The Subscription Package Includes:

- Total 33 Online Courses in UML 2.0, Use Case Modeling, Unified Process, BPMN, SysML and More for unlimited Access during the subscription period!
- Every month, there will be *No Less than 2 new courses* added to the Training Center in the up-to-date in OO technologies, case studies, exercise and tips and tricks on modeling tool added.
- Lots of Examples, case studies and exercises that allow users to practice the application.
- Downloadable PDF of the online courses included.
- Award-Winning tool license for hands-on, free-of-charge!

Course Fee:

- US\$ 69 for 1 month access to all training courses
- US\$ 299 for half year access to all training courses
- US\$ 499 for 1 year access to all training courses
- Free subscription for access free courses

Don't wait another minute! Subscription now!

Study Areas:

Lifecycle Process	Modeling Techniques	Courses
UML Introduction	UML 2.1 Update	<ul style="list-style-type: none"> Introduction to UML (48 Mins) UML 2.1 Getting Started (16 Mins)
Process Lifecycle	Unified Process	Introduction to Unified Process (30 Mins)
Business analysis	Business Modeling	<ul style="list-style-type: none"> Understanding BPMN (20 Mins) BPMN Fundamentals (20 Mins) Business Process Modeling Technique (1:11 Hrs) BPMN 2.0 (1:03 Hrs) Write Operational Procedure and Glossary (16 Mins)
	BPEL	Generate BPEL from BPMN (30 Mins)
Requirements Capturing	Use Case Modeling	<ul style="list-style-type: none"> Use Modeling and Analysis I (1 Hrs) Use Modeling and Analysis II (1:44 Hrs) Using Use Case Diagram (2:13 Hrs) Document Use Case using Use Case Detail (15 Mins)
System Modeling	Domain Analysis	Object Identification with Textual Analysis (13 Mins) --> Structural Analysis II
	Structural Modeling	<ul style="list-style-type: none"> Structural Modeling I (1 Hrs) Using Class Diagram (26 Mins)
System Architecture Modeling	Behavior Modeling	Behavior Modeling I (1 Hrs) <ul style="list-style-type: none"> Activity and Sequence Diagram Behavior Modeling II <ul style="list-style-type: none"> New Interaction Diagrams (22 Mins) Communication Diagrams (28 Mins) State Diagrams (24 Mins) Using Timing Diagram (14 Mins)
	Architectural Modeling	Architectural Modeling I (27 Mins) <ul style="list-style-type: none"> Package Diagrams Architectural Modeling II <ul style="list-style-type: none"> Implementation Diagrams (20 Mins) Architectural Modeling III <ul style="list-style-type: none"> MVC using Robustness (25 Mins)

System Engineering	Systems Engineering Modeling	<ul style="list-style-type: none"> • Overview of SysML (21 Mins) • Modeling Req. and Structure (32 Mins) • Activity Modeling with SysML (22 Mins) • Modeling Constraint & Parameters (17 Mins)
Implementation	Database Modeling	<ul style="list-style-type: none"> • Basic Database Modeling Techniques (16 Mins) • Practical Database Modeling with Oracle (36 Mins) • Developing Web Application with Hibernate, Java Server Faces, Tomcat and MySQL (52 Mins) • Using Hibernate in Enterprise Scale Project (31 Mins)
	Code Engineering	<p>Generate UML Class Diagram to Java (1:13 Hrs)</p> <ul style="list-style-type: none"> • Mapping between UML Class Diagram and Java • Java Code Round-Trip Engineering with VP-UML • Java Code Round-Trip Engineering with SDE-EC • Java Code Round-Trip Engineering with SDE-NB
Practical Skills	Team Development	<ul style="list-style-type: none"> • VP Teamwork Server Install and Configuration (21 Mins) • Collaborative Modeling with VP Teamwork Server (25 Mins)
	Miscellaneous	<ul style="list-style-type: none"> • Reuse Model Element with Dependent Projects (11 Mins)
